

## Ganpati Chemical

Ganpati Chemical objective is to provide the optimum products and services to our channel partners to improve profitability and promote growth. We understand that starting a new business, changing careers, or changing suppliers can be difficult. We are specifically organized to ease these transitions, providing critical benefits and resources to our partners:

- Business Protection
- Confidentiality to protect your business
- Application and Sales Support
- Industry experts to work with you
- Make product recommendations
- Troubleshooting and Technical Support
- Participate in critical meetings
- Technical and sales training
- Product application guides
- MSDS's, product data sheets, technical bulletins
- Laboratory for R&D, quality control, competitive product evaluation
- Custom Formulating
- Delivery & Inventory

### Equipment Solutions

A major cause of water treatment program failure is using the incorrect or improperly operating equipment. Ganpati Chemical places a special emphasis on equipment's. We maintain a well staffed equipment division with the product line, expertise, and commitment necessary to provide cost effective solutions.

### Expert Services

Ganpati Chemical is committed to providing high quality service and is proud to offer one of the most comprehensive service packages including books, software's, training and technical support.

### Precision Manufacturing

All products are manufactured in our state-of-the-art manufacturing facility located in Balidih Industrial Area, Bokaro, Jharkhand. Our commitment to quality is reflected in our ISO 9001:2008, 14001 & OSHAS Certification. Ganpati Chemical performs quality control testing on every batch prior to supply. All batch retains are checked multiple times throughout to ensure continued product stability.

(Chemical Manufacturer)

## Company Brief

In 2005, Ganpati Chemical was established with the core business focus to provide water treatment products and technical support to Original Equipment Manufacturer (OEM's). Today, Ganpati Chemical formulates and manufactures products to water treatment partners in India. Since moving to our current location in 2007, Ganpati Chemical Balidih Industrial Area, Bokaro, Jharkhand manufacturing facility has, and will continue to, expand and upgrade to meet the growing needs of our distributor based customers and prospects.

Our current manufacturing facility is over 30,000 square feet with a total manufacturing capacity well in excess of our existing requirements. For technical and sales support, the Ganpati Chemical team has over 20 years of combined experience in the development and field application of water treatment chemicals to the industrial and commercial boiler, cooling, reverse osmosis and wastewater treatment.

Utilizing excellent raw material supplier relationships, efficient manufacturing methods and highly competitive rates, Ganpati Chemical continues to deliver chemical solutions to an expanding team of water treatment partners throughout India and overseas at highly competitive prices.

Your time is valuable, and so is your customer's. So spend it doing what you do best marketing and servicing your customer. Leave the manufacturing to the experts at Ganpati Chemicals

Ganpati Chemical recognizes the key to our success is our business partners. The fundamental principle of our low cost manufacturing strategy is to pursue water treatment markets through selected channel partners. We have designed our business model to increase the profitability of our customers allowing us to attract and retain the highest caliber distributors.

Working closely with you, Ganpati Chemical can help provide the expert support that you need in this technical market. You can depend on Ganpati Chemical for the latest technology and highest quality water and wastewater treatment chemicals at the best value in the market place.

1. SODIUM HYPOCHLORIDE
2. BLEACHING POWDER
3. HYDRATED LIME
4. FERRIC ALUM
5. ACIDS
6. ELECTROLYTES and many more.....

## Ganpati Chemical Range And Technologies

Hydrated Lime	
GUARANTEED DRY WEIGHT ANALYSIS:	
Calcium (Ca)	34.20%
Magnesium (Mg)	20.40%
Minimum Calcium Oxide (CaO)	46.50%
Minimum Magnesium Oxide (MgO)	32.00%
Calcium Carbonate Equivalent (CCE)	131.70%
Effective Neutralizing Value (ENV)	129.52%
Minimum ECCE	131.70%
Derived from calcium hydroxide	
Lime Score (Oregon)	130.38
FINENESS:	
Minimum passing 10 mesh sieve	100.00%

### **Reverse Osmosis Chemicals**

Ganpati Chemical manufactures complete range of antiscalants and cleaning chemicals. Our range of technically advanced water treatment chemicals includes membrane cleaners, dispersants, scale inhibitors, sequestrants, detergents and biocides.

### **Cooling Treatment Solutions**

A customised water treatment program from Ganpati Chemical does more than just protect cooling water system from corrosion, fouling, deposits, and microbiological growth. It helps maximize the life, efficiency, reliability, and safety of cooling water system while keeping energy, water, and maintenance costs to a minimum. Ganpati Chemical provides innovative and effective treatment technologies for all types of cooling system designs and applications.

### **Boiler Treatment Solutions**

Water treatment is a critical part of the preventative maintenance program for any boiler system. Even a small reduction in boiler efficiency due to scale deposits, excess blowdown, or condensate loss can cause a huge increase in operating costs. A customized water treatment solution from Ganpati Chemical helps protect boiler system from the harmful effects of corrosion, scale, and carryover.

### **Pretreatment and Wastewater Treatment Solutions**

Ganpati Chemical offers a wide range of proven wastewater treatment technologies for removing pollutants, minimizing sludge handling and disposal costs, improving effluent quality, and promoting water savings and reuse. Our waste water treatment products and application expertise help all types of industries meet compliance goals, improve operational efficiencies, and conserve valuable natural resources.

### **Speciality Formulations**

Complete range of chemicals for Cleaners, Food, Beverages, Metal Treatment, Oil Field, Construction, Mining, Textile, Pulp and Paper, Sugar Processing, Agriculture, Speciality Polymers and Invert Sugar.
